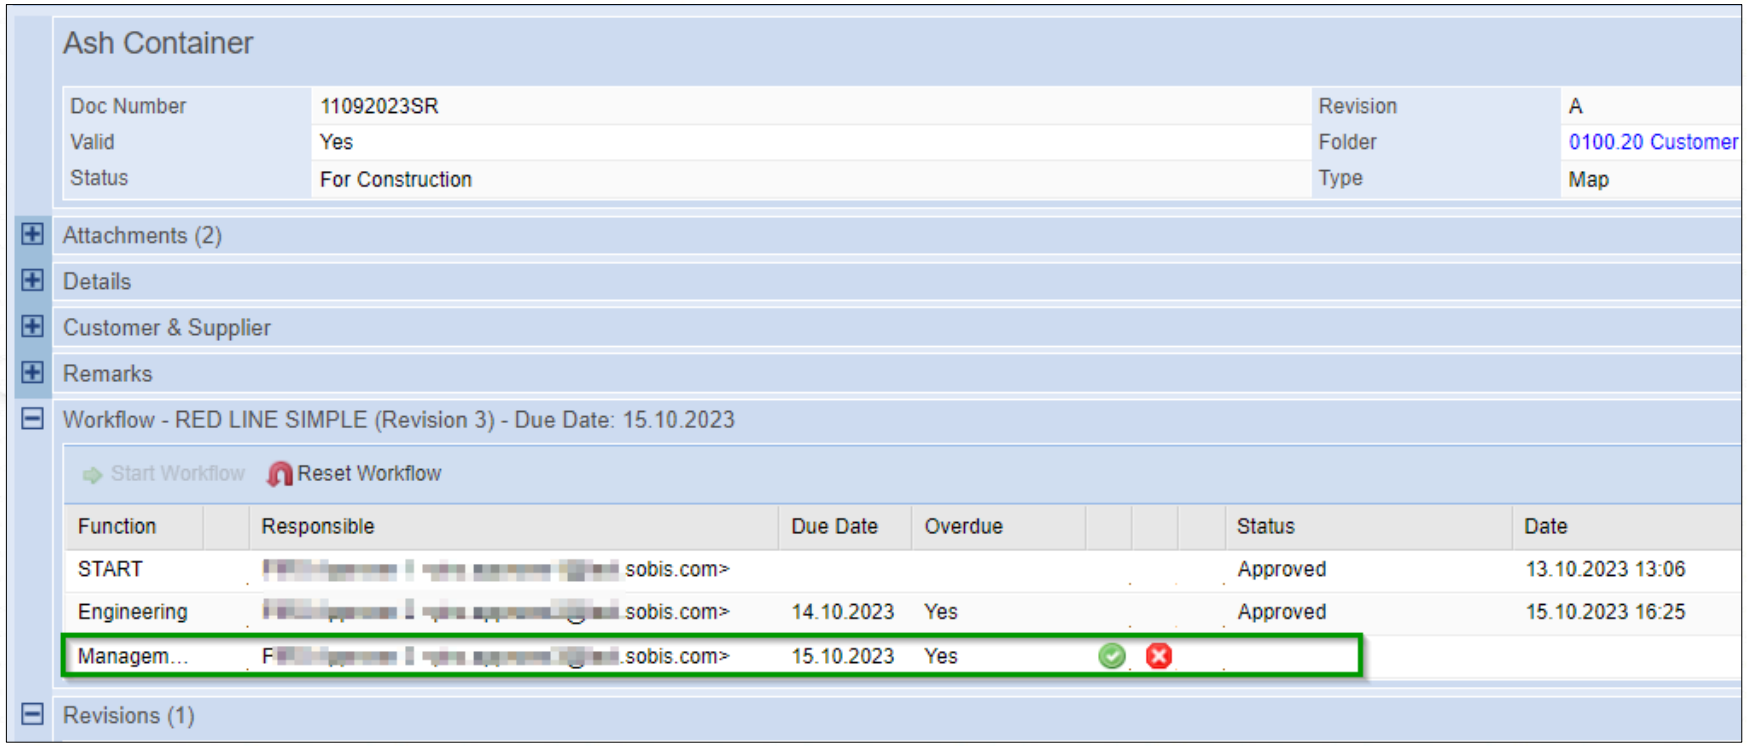
PIRS – Highlights and Improvements

Release 3.62

Workflow Notification Reminder

Implementation of a mail reminder that notifies responsible(s) about pending workflow steps:



The email notification can be set up individually according to your project needs. Please talk to SOBIS if you want this feature to be enabled.

Workflow Notification Reminder – Example mail

From System PIRS <no.reply@sobis.com>

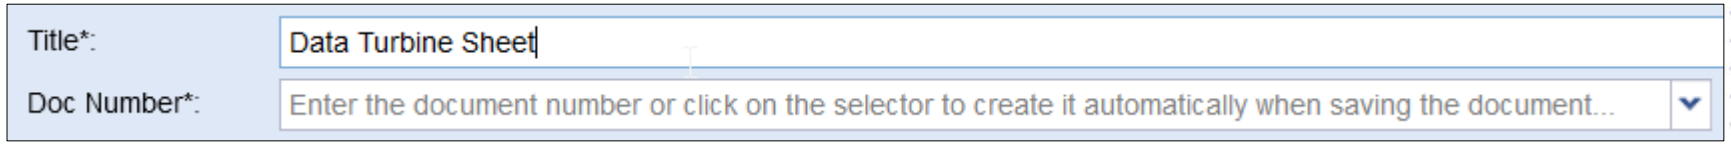
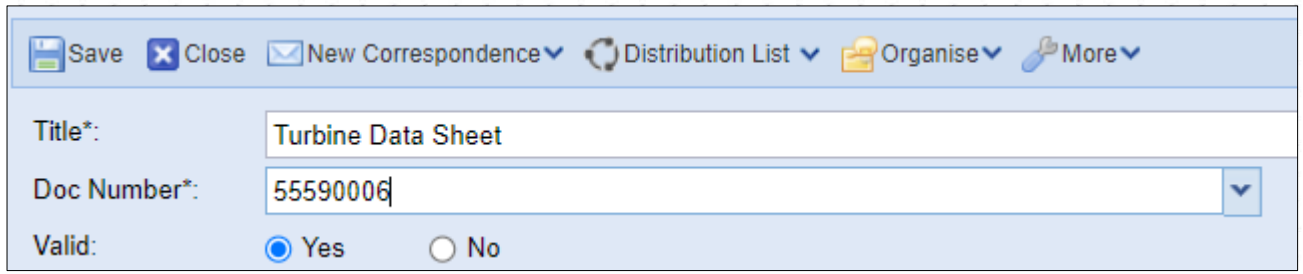
New options to generate the document number

In a new document, enter the number or click on the selector to create it automatically:



If selector is pressed the auto number is set:

The number is created when document is saved:



The new number may also be created based on a counter (within a single project or across several projects).

File Viewer Upgrade

Provides bugfixes and minor changes:

- Right mouse click
- Insert and Replace annotations
