Track Tags in log history

The screenshot displays the SOBIS-48665 document interface. A modal window titled "PIRS - Document log" is open, showing a log history table. The table has columns for "Last modified", "Field", and "Modified by". The third entry shows a change to the "Tags" field on 25.05.2022 at 11:36. Below the table, a detailed view for the selected entry shows the "Field" as "Tags", the "Date" as "25.05.2022 11:36", and the change from "Original value: Claim" to "New value: Claim, Critical".
