

PIRS – Highlights and Improvements

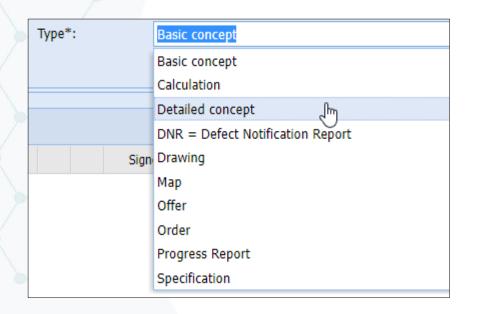

Improve field search (finds any match)

The field search for selection fields has been improved to return any matching value.

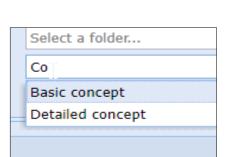

Example

A search for "Co" in the Type field with following values:

Will return following results:

(none of the values starts with "Co")

New release ("Co" is available in two values)

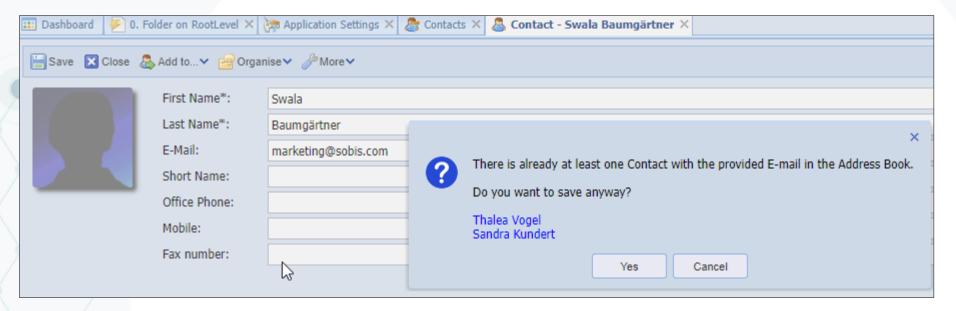

New filter for correspondence thread helps to find E-Mails or Transmittals that has been replied to easier.

New email validation helps avoid unintentional duplicates.

Further improvements

- Auto Filing → Improved handling of duplicate contacts
- File Viewer \rightarrow Silent "check out / check in" of a file annotated in File Viewer
- Portal -> Store new revision in parent folder also if previous revision is not available in Portal
- Correspondence → From allows selection of internal users only
- Security → Prevent opening PIRS if browser is outdated (Internet Explorer)

THANK YOU! VIELEN DANK! GRAZIE!
