• New customizable "Hamburger" menu for quick access to other applications

2. New Features for Project Administrators

- Define e-mail templates for faster creation of repetitive correspondence (via Predefined Actions)
- 'Create file from template' to create MS Word or MS Excel files (e.g. cover pages) based on document content
- Allow new options for custom folder names when download attachments
- Mark inactive/old Correspondence Codes in Project Administration
- Improve performance of project import with many folders
- Introducing new (optional) reference number category as part of the PIRS Reference Number to allow unique numbering of different correspondence types with the same correspondence code combination (not yet activated at HZI)

3. Improvements

• Show date and time in download dialog window

PIRS - Files in p	ogress				×

- Added error handling to FileViewer
- Default forward action is changed to 'Forward with attachments' instead of 'Forward'
- Document number and revision are displayed in separated columns within comments and transmittals
- Improve error message if duplicates are found during document import

4. Fixed Issues

• Cancellation of large reports did not work in all cases

• Saving a post in Activity Stream caused an error

• FileViewer Loading Indicator is not shown until the file is loaded

- Wrong pagination in user groups grid
- Issue that caused an empty 'deletion date' column in the recycle bin

🔁 Folders 🛛 😭 😭 🗢 🛨	🔶 teports 🗷 🏾 🗮 Activity Stream	8 🚨	Contact - Herber	🙁 🧰 All Correspondence 🙁
